

## HOW TO BUY GRANITE

1. Select an experienced stone fabricator registered under The Pennsylvania Home Improvement Consumer Protection Act.
2. Be certain that the company employs fully insured Templaters and Installers and not uninsured sub-contractors.
3. Only purchase Select or 1st Choice stone materials - not 2nd choice or commercial grade stones.
4. Use a company with a highly experienced Design Consultant to assist with the finer details of your project.
5. Buy from a company that imports directly, as they know the source of the material and can provide the best protective resins and highest finishes.
6. So that you understand the color and full pattern that will arrive at your home, only purchase stone after reviewing full slabs. Do not purchase from samples.
7. Get a lifetime warranty from a longstanding company for the installation and your peace of mind.
8. Ask to see and feel examples of the fabricators seam quality.
9. Purchase from a fabricator with Computerized Numeric Control (CNC) machinery so that your edges are precision milled and diamond polished, providing the highest quality edge finishes.
10. Check the company's rating at the Better Business Bureau [www.bbb.org](http://www.bbb.org).
