

SINK GUIDELINES

After installing thousands of jobs, we have learned that selecting a sink that properly fits in your sink base and countertop is an important technical requirement of any countertop fabrication. Please consider the following items when purchasing a sink outside of Suburban:

1. Not all sinks will fit in the dimensions of your sink base cabinet and/or countertop.

2. Technical requirements that must be considered:

- Size of sink base cabinet;
- 3 1/2" minimum countertop material required in front and back of sink cut-out
- Allowance for any backsplash material
- Allowance for sink flange
- Allowance for tilt trays (if applicable)
- Material remaining behind sink cut-out may only accommodate certain size faucets and/or a limited amount of drillings;
- Confirm faucet handle will operate unobstructed.
- Consider sink depth

***If at template it is determined that your sink and/or faucet configuration does not work, a new installation date will be required pending your purchase of new sink and/or faucet.**

****Suburban Marble & Granite, Inc. is committed to providing you the best customer service in the stone industry and supplies sinks and/or faucets at your request.**
